

# FY03 DON Pilot Project Summary

---

**Project Name:** Unit Level Ammunition Status (#351)

**Command:** USMC

**Functional Area Manager (FAM):** Logistics

---

**Pilot Summary:**

ULAS provides capability for the deployed unit level to issue orders, provide accountability and visibility of ammunition requisitioning and receipting. This gives decision makers and customers the ability to obtain ammunition related data for use as a decision-making support tool. This project leverages the PDA-accessible tactical communications network, developed in conjunction with the DON eBusiness Naval Construction Forces Seabee Link pilot, as the conduit for exchanging this ordnance data.

**Business Value Added:**

- Improved ammunition asset visibility
- Real-time status reporting for and between deployed units

**Other Considerations:**

- Twenty prototype units deployed during Iraqi Freedom

**Pilot Participants:**

- Unit level Ammunition Scorecard
- MARSYSCOM
- MCAGCC 29 Palms
- JCS

**Targeted Users:**

- Ammunition Logisticians / Supply Chain
