

FY02 DON Pilot Project Summary

Project Name: LISBON – E-LOGREQ (#452)

Command: COMPACFLT

Functional Area Manager (FAM): Logistics

Pilot Summary:

LISBON developed a fully integrated web-based logistics system for ships' overseas port visits. Ships will be able to request services from a port specific web catalog of existing contracts (Shopping). Non-contract items are routed to in-theatre Naval Regional Contracting Centers (NRCC) for purchasing action through a web-based contracting system. The system provides access to information for management reports, historical data and trend analysis.

Business Value Added:

- Shore based web-enabled solution
- Provides a complete electronic Task Order process for ships' port visits
- Improves supplier management
- Provides timely access to contractor performance and metrics
- Utilizes paperless transactions
- Eliminates multiple legacy systems
- Minimizes shipboard workload

Other Considerations:

- System was not implemented due to licensing conflicts with ORACLE

Pilot Participants:

- U.S. Naval Forces Pacific Fleet
- NRCC Singapore
- CINCPACFLT

Targeted Users:

- Ship Supply Officers
- Husbanding Agents
- TYCOMs
