

FY04 DON Pilot Project Summary

Project Name: Navy Net-centric Aircraft Maintenance Pilot Project (#1329)

Command: NAVAIR

Functional Area Manager (FAM): Logistics

Pilot Summary:

The pilot brings legacy maintenance databases, electronic maintenance manuals, and other resource information to technicians and supervisors at the point of maintenance through a wireless network. This tool will allow NAVAIR to significantly reduce associated E2-C aircraft maintenance costs.

Business Value Added:

- Increased productivity & Reduced operational costs
- Resolves interoperability issues between different classes of Integrated Electronic Technical Manuals (IETMs)
- Integration with FORCENet
- Decreased erroneous material expenditures
- Reduced training time

Other Considerations:

- Support includes LANTFLT Deputy, DCNO N4, DCNO N4B/Logistics & Readiness FAM, NAVAIR 6.0, NAVAIR 3.0
- Telos is investing an additional \$200,000 into the pilot
- Incorporated into FORCENET via SeaTrial: Will be tested shipboard

Pilot Participants:

- NAWC Paxtuxent River
- Test Ship (TBD)

Targeted Users:

- Maintainers Afloat & Ashore
